WHERE:
At-home using computer and internet connection

WHEN:
Rolling start dates
Beginning in November
Weekday afternoons or Saturdays

COST:
Free *
First come, first served

Computer and internet access required to participate.

A Catholic Schools of the Archdiocese of New York offering, powered by **Full Bloom**

Impact for Life

*Provided via Title I and additional grants; according to eligibility and allocable funds.

Extended Learning Day programming invites your student to continue the learning that starts in the classroom. Sessions are designed to include a holistic experience for students composed of targeted math and literacy instruction as well as STEM and SEL activities to encourage personal growth in a collaborative virtual classroom. [Visit the student registration page](#) for scheduling information!

Program Components

Core Academics

Students will develop the tools and confidence to grapple with grade-level math and literacy skills using familiar and new strategies.

Social-Emotional Support

Teachers will lead students through activities that identify and foster healthy habits.

STEM

K-2 students will follow along with at-home science activities that spark imagination and creativity. Students in grades 3+ will use STEM software to practice coding and building a robot.

Co-Curricular Activities

All students in enrichment blocks will participate in Virtual Field Trips at regular intervals. Our virtual classroom can go anywhere in the world, or even into space!

Family Support

All parents of students enrolled in Extended Learning Day programming are invited to attend free virtual parent workshops. These focus on timely and relevant topics like Digital Citizenship and Parenting Through Adversity.

Keys to Success

1

Small-Group Experience:

With fewer than ten students in a group, Extended Learning Day teachers are able to provide individualized attention and students can really collaborate with peers.

2

Integrated Instruction:

The scope and sequence for math and literacy is designed to work in sync with classroom instruction.

3

Funded by federal and grant dollars:

This exciting opportunity is available to your student free of charge to you!

Space is limited, sign up now!

“My daughter was happy to be in class every day. She learned new things in math and reading that will truly benefit her going into second grade.”
