

# CATAPULT TITLE I INTERVENTION SERVICES

for School Year 20-21

## Free Extended Learning!

Parents can register their children for engaging small group educational activities as determined by the school, to supplement their core classroom learning. Sessions will be designed to best suit the individual learner.

Seventh-day Adventist Schools  
of New York

Free  
First come, first served

Computer and internet access required to participate.

A Seventh-day Adventist School offering, powered by **Full Bloom**  
Impact for Life

The SDA Schools of NY and Catapult Learning invite your student to continue the learning that starts in the classroom. Sessions are designed to include a holistic experience for students composed of targeted math and literacy instruction as well as STEM and SEL activities to encourage personal growth in a collaborative classroom. Visit the [student registration page](#) today!

## Program Components

### Core Academics

Students will develop the tools and confidence to grapple with grade-level math and literacy skills using familiar and new strategies.

### Social-Emotional Support

Teachers will lead students through activities that identify and foster healthy habits.

### STEM

K-2 students will follow along with at-home science activities that spark imagination and creativity. Students in grades 3+ will use STEM software to practice coding and building a robot.

### Co-Curricular Activities

Students in enrichment blocks will participate in Virtual Field Trips at regular intervals. A virtual classroom can go anywhere in the world, or even into space!

### Family Support

All parents of students enrolled in programming are invited to attend free virtual parent workshops. These focus on timely and relevant topics like Digital Citizenship and Parenting Through Adversity.

## Keys to Success

1

### Small-Group Experience:

With fewer than ten students in a group, Extended Learning Day teachers are able to provide individualized attention and students can really collaborate with peers.

2

### Integrated Instruction:

The scope and sequence for math and literacy is designed to work in sync with classroom instruction.

3

### Funded by federal dollars:

This exciting opportunity is available to your student free of charge to you!

**Space is limited, sign up now!**

“My daughter was happy to be in class every day. She learned new things in math and reading that will truly benefit her going into second grade.”

— Parent of 1st Grade  
Extended Learning Year Student
