

BACK-TO-SCHOOL SERVICES

Bridging Learning Gaps and Achieving Positive Student Outcomes

A new school year is upon us, and schools continue to face pandemic-induced challenges. Learning loss is still prevalent, and teachers and school leaders are busier than ever trying to close those achievement gaps.

Catapult Learning's Accelerated Learning program is designed to combat learning loss, but just as importantly, it's meant to support those who need it most—students who are struggling to make up lost ground and teachers who are being pulled in so many different directions.

Catapult Learning's Accelerated Learning Services

Coaching and Professional Development Pathways:

Centered on timely topics, Professional Development Pathways equip your leaders and teachers to serve the whole child – whether in general or special education. Each theme bundles workshops and high-impact coaching that can enhance your staff's expertise – and ultimately influence student achievement.

High-Dosage Tutoring & Intervention:

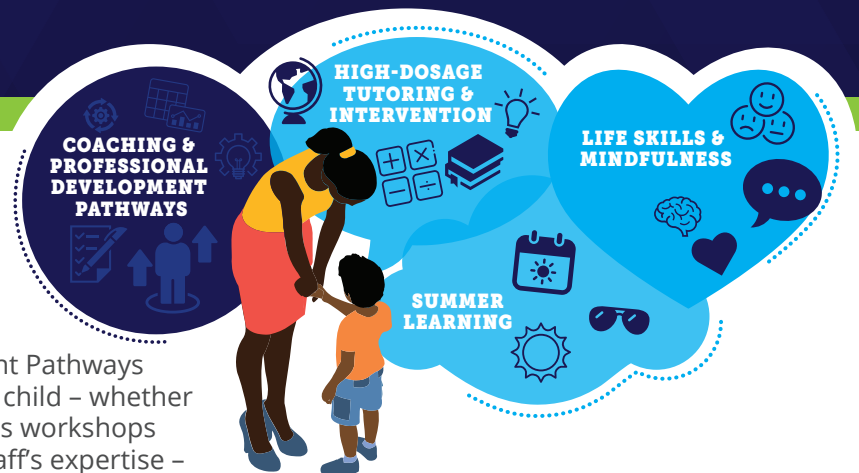

High-Dosage Tutoring is a comprehensive approach that works by activating existing and relevant knowledge, building prerequisite skills, and reinforcing foundational skills in the current grade's core content. Additionally, our math and reading/literacy intervention programs help struggling learners regain their confidence through intensive, small-group instruction. Combined, our High-Dosage Tutoring and intervention programs can result in more than one year's worth of academic progress in less than one full school year.

Life Skills & Mindfulness:

Catapult Learning's Life Skills & Mindfulness programming is based on the understanding that the best learning emerges as a result of supportive relationships that make learning challenging, engaging, and meaningful. Our programs, with focuses on Counseling, Family Engagement, and Professional Development, expand students' 21st century skills in critical thinking, collaboration, creativity, and empathy—all necessary for success in college, careers, and beyond.

Summer Learning:

Our turnkey K-12 Summer Learning program—designed to prepare students for the fall—offers a comprehensive suite of programs, educational opportunities, and engaging activities that can be tailored to address the specific academic, social, and emotional needs of your students and their families...all while having fun.
